## **Human Rights and the South African**

### **Legal Order**

**C.J.R. DUGARD**

In this strong indictment of the South African legal order, Dugard, a native lawyer, provides a thorough description and probing analysis of the workings of the system. By placing South African law within the wider context of its history, politics, and culture, he shows that law, as an abstract body of rules, cannot be fairly criticized apart from the social and political setting in which it operates. Cloth, \$27.50 • LPE\*, \$9.75 • (Spring 1978)

## **Labyrinths of Power**

Political Recruitment in Twentieth-Century Mexico

**PETER H. SMITH**

Using quantitative techniques, Smith offers a penetrating look at the structure and transformation of political life in modern Mexico. He examines the results of the Revolution of 1910 and draws conclusions about class composition of the national elite, separation of political and economic elites, various routes to political success, and the role of popular constituencies. Cloth, \$25.00 • LPE\*, \$9.75 • (Summer 1978)

## **The Middle Passage**

Comparative Studies in the Atlantic Slave Trade

**HERBERT S. KLEIN**

This is a quantitative historical analysis of the English, French, Portugese, and Spanish slave trade from 1700 to 1850. Klein analyzes the basic demographic features of the transatlantic slave trade, the experiences of the transoceanic crossing (the Middle Passage), and the impact of this forced migration. Cloth, \$20.00 • LPE\*, \$9.75 • (January 1978)

## **The State and Society**

Peru in Comparative Perspective

**ALFRED STEPAN**

To better understand the relationship between state and society in various parts of the world today, particularly the Iberian countries and their former Latin American colonies, Stepan develops a theoretical model he labels, "organic statism." He applies this to an analysis of Peru, which he sees as "one of the major contemporary attempts in the Third World by a strategic elite to use the power of the state to restructure society." Cloth, \$18.50 • Paper, \$3.95 • (Spring 1978)

## **Imperialism and Industrialization in Brazil**

**PETER EVANS**

Whether the penetration of capitalism into the economies of underdeveloped countries has fostered or retarded their industrialization has been a source of much debate in the literature of imperialism. Arguing for a dynamic view that sees imperialism adapting to changing circumstances, Evans explores the network of relationships among multinational corporations, local private entrepreneurs, and the state that has developed in Brazil over the last decade. \$16.50 (tentative) • (Fall 1978)

# The Rulers of German Africa

## 1884–1914

*L. H. Gann & Peter Duignan.* The first book in a series dealing with the social structure of the European colonial services in Africa, this work examines Germany's military and administrative personnel in the colonies of German East Africa, South-West Africa, Cameroun, and Togo: their performance on the scene, their educational and class background, their ideology, their continuing ties with the homeland, and their subsequent careers. The authors acknowledge that brutal and overbearing though many administrators were, their achievements were substantial and their affect on the colonies profound. \$17.50

### **GUARDIANS OF THE DYNASTY**

A History of the U.S. Created  
Guardia Nacional de Nicaragua and  
the Somoza Family

by *Richard Millett*

*Introduction by Miguel d'Escoto, M.M.*

The history of Nicaragua is perhaps the saddest history of any country in continental Latin America. Unfortunately, U.S. interference in Nicaraguan political problems is one of the main factors that have brought about this sad history. *Guardians of the Dynasty* is the long-awaited story of the institution most responsible for maintaining in power the longest-lasting dictatorship in Latin America. It provides ample and irrefutable evidence to demonstrate the corrupt and oppressive nature of the Somoza dynasty and the total bankruptcy of Washington's Nicaragua policy.

# *A Rationale for Innovation . . .*

*University Press of America presents a new concept in academic publishing that addresses directly two of this industry's foremost challenges:*

## **The demands of a volatile environment.**

As curriculums require more frequent revisions due to advances in the social and technical sciences, the traditional text, with its lengthy gestation period, can become quickly outdated.

## **The needs of a competitive academic profession.**

Due to conventional processes that are becoming ever more costly, the traditional publishing industry no longer affords adequate opportunity for deserving professors to become published.

## **An innovative alternative.**

The University Press of America's new concept is a vastly simplified approach to publishing, developed by academics, that effectively counters these growing challenges.

Its acceptance is best evidenced by the more than 100 new University Press of America titles to be found in a growing number of respected colleges and universities.
