

Correction to my paper
"How to Program an Infinite Abacus"

J. Lambek

In my paper "How to program an infinite abacus"
(Can. Math. Bull. 4(1961) p. 300) the program in part V
of the proof of the theorem should be de-bugged by placing
the instruction "Y+" two steps further down in the flow chart,
that is just before the instruction "empty V".
