

## ANNOUNCEMENT

The following Opinions and Cases have been published recently by the International Commission on Zoological Nomenclature in the *Bulletin of Zoological Nomenclature*, volume 45, 1988.

## Opinion no.

- 1486 *Tubulanus* Renier, [1804] and *T. polymorphius* Renier, [1804] (Nemertea): reinstated and made available.
- 1499 *Lepralia punctata* Hassall, 1841 (currently *Cribrilina punctata*; Bryozoa, Cheilostomata): replacement neotype designated.
- 1501 *Alveolina* d'Orbigny, 1826 (Foraminiferida): *Oryzaria boscii* Defrance in Bronn, 1825 designated as the type species.
- 1502 *Conus fergusonii* G.B. Sowerby III, 1873 (Mollusca, Gastropoda): specific name conserved.
- 1503 PSEUDOCALANIDAE Sars, 1901 (Crustacea, Copepoda): not to be given precedence over CLAUSOCALANIDAE Giesbrecht, 1892.
- 1512 *Desorella* Cotteau, 1855 (Echinodermata, Echinoidea): confirmation of *Hyboclypyus elatus* Desor, 1847 as the type species.

## Case no.

- 2225/1 *Nonion* de Montfort, 1808 (Foraminiferida): proposed designation of *Nautilus faba* Fichtel & Moll, 1798 as the type species.  
**Abstract.** The purpose of this application is to designate the nominal species *Nautilus faba* Fichtel & Moll, 1798 as the type species of *Nonion* de Montfort, 1808. This is in conformity with the established concept of *Nonion* since its proposal.
- 2225/2 *Hanzawaia* Asano, 1944 (Foraminiferida): proposed conservation.  
**Abstract.** The purpose of this application is the conservation of the foraminiferan generic name *Hanzawaia* Asano, 1944 by the suppression of the senior synonyms *Florilus* de Montfort, 1808 and *Nonionina* d'Orbigny, 1826.
- 2225/3 *Calcarina* d'Orbigny, 1826 (Foraminiferida): proposed conservation.  
**Abstract.** The purpose of this application is the conservation of the name *Calcarina* d'Orbigny, 1826 against the possible senior synonym *Tinoporus* de Montfort, 1808.
- 2225/4 *Dendritina* d'Orbigny, 1826 (Foraminiferida): proposed conservation.  
**Abstract.** The purpose of this application is the conservation of the name *Dendritina* d'Orbigny, 1826. It is threatened by *Pelorus* de Montfort, 1808, unused since its proposal but whose type species has been found to be congeneric with that of *Dendritina*.
- 2225/5 *Planularia* Defrance, 1826 (Foraminiferida): proposed conservation.  
**Abstract.** The purpose of this application is the conservation of the foraminiferan generic name *Planularia* Defrance, 1826 by the suppression of its unused senior subjective synonym *Linthuris* de Montfort, 1808 and of the unused homonym *Planularia* Nilsson, 1826.
- 2225/6 *Borelis* de Montfort, 1808 (Foraminiferida): proposed conservation.  
**Abstract.** The purpose of this application is to conserve the foraminiferan generic name *Borelis* de Montfort, 1808 in its accepted sense by the designation of *Nautilus melo* Fichtel & Moll, 1798 (defined by a recently designated neotype) as its type species, replacing the original but subsequently unused *Borelis melonoides*.

- 2225/7 *Nautilus repandus* Fichtel & Moll, 1798 (currently *Eponides repandus*; Foraminiferida): proposed replacement of the neotype.  
**Abstract.** The purpose of this application is to set aside the neotype for *Nautilus repandus* (the type species of *Eponides* de Montfort, 1808) designated in 1962. The holotype of this species, once believed lost, was discovered and redescribed in 1984. The holotype and neotype are conspecific.
- 2612 *Palaemon longirostris* H. Milne Edwards, 1837 (Crustacea, Decapoda): proposed conservation of the specific name.  
**Abstract.** The purpose of this application is the conservation of the well known and widely used specific name *longirostris* H. Milne Edwards, 1837 (p. 392) for the white prawn, *Palaemon longirostris*, by the suppression of the unused senior synonym *Astacus albescens* Pennant, 1812. In addition *P. longirostris* H. Milne Edwards, 1837 p. 392) is threatened by the first reviser action of Heller (1836), who gave the name *P. longirostris* H. Milne Edwards, 1837 (p. 394) precedence over its homonym published two pages earlier.
- 2622 *Pleuromma princeps* Scott, 1894 (currently *Gaussia princeps*; Crustacea, Copepoda): proposed conservation of the specific name.  
**Abstract.** The purpose of this application is the conservation of the widely used copepod specific name *princeps* Scott, 1894, by ruling that it is not invalid, despite having been rejected before 1961 as a former junior secondary homonym of *Metridia princeps* Giesbrecht, 1889.

The Commission regrets that it cannot supply separates of Opinions.
