# CONTENTS

NO.		PAGE
1	On Measurable Selections. By A. P. Robertson, Department of Mathematics, University of Keele . . . . .	1
2	Semi-bounded Second-order Differential Operators. By M. S. P. Eastham, Department of Mathematics, Chelsea College, University of London. <i>Communicated by Professor W. N. Everitt</i> . . . . .	9
3	A Note on Quadratic Systems. By Einar Hille, Department of Mathematics, University of California, San Diego, La Jolla. <i>Communicated by Professor W. N. Everitt</i> . . . . .	17
4*	A Cauchy Problem for an Ordinary Integro-differential Equation. By E. A. Catchpole, Fluid Mechanics Research Institute, University of Essex. <i>Communicated by Professor W. N. Everitt</i> . . . . .	39
5	Separation of Variables (An Abstract Approach). By Salah Eldin A. Mohammed. <i>Communicated by Professor W. N. Everitt</i> . . . . .	57
6*	The Instability of Two Vortex Sheets Enclosing a Subsonic Jet due to Acoustic Radiation. By N. Hardisty, Department of Mathematics, University of Dundee. <i>Communicated by Professor D. S. Jones</i> . . . . .	79
7*	High-frequency Scattering in a Certain Stratified Medium. By W. G. C. Boyd, Department of Mathematics, University of Dundee. <i>Communicated by Professor D. S. Jones</i> . . . . .	93
8	On Second-order Differential Inequalities. By F. V. Atkinson, Department of Mathematics, University of Toronto. <i>Communicated by Professor W. N. Everitt</i> . . . . .	109
9	A Note on the Hypergraph of a Mapping between Uniform Spaces. By A. G. Hitchcock, Department of Mathematics, University of Rhodesia, POB MP 167, Mount Pleasant, Salisbury, Rhodesia. <i>Communicated by Professor W. N. Everitt</i> . . . . .	129
10	The Area-function for Non-linear Second-order Oscillations, By F. V. Atkinson, Department of Mathematics, University of Toronto. <i>Communicated by Professor W. N. Everitt</i> . . . . .	135
11*	High-frequency Scattering in a Certain Stratified Medium. The two-part Problem. By W. G. C. Boyd, Department of Mathematics, University of Dundee. <i>Communicated by Professor D. S. Jones</i> . . . . .	149
12*	On an Inequality of Hardy and Littlewood. By K. W. Brodlie and W. N. Everitt, Department of Mathematics, University of Dundee . . . . .	179
13	On a Problem of Transformations between Limit-circle and Limit-point Differential Equations. By F. Neumann, Brno, Czechoslovakia. <i>Communicated by Professor W. N. Everitt</i> . . . . .	187
14*	The effect of Radiation due to a Moving Source on a Vortex Sheet. By D. S. Jones, Department of Mathematics, University of Dundee . . . . .	195
15	A Class of Focal Points for Non-self-adjoint Fourth-Order Differential Equations. By Kurt Kreith, Chelsea College, University of London. <i>Communicated by Professor W. N. Everitt</i> . . . . .	207
16	A Note on Adjoint Operators. By A. Dijksma and H. S. V. de Snoo, Mathematisch Instituut, Rijksuniversiteit te Groningen. <i>Communicated by Professor W. N. Everitt</i> . . . . .	210
17	The Limit-point and Limit-circle Cases for Polynomials in a Differential Operator. By Anton Zettl, Department of Mathematics, Northern Illinois University, Dekalb, Illinois 60115, USA. <i>Communicated by Professor W. N. Everitt</i> . . . . .	219
18*	The Isotropic Turbulent Dynamics of a Maxwell Fluid. By W. D. McComb, School of Engineering Science, University of Edinburgh. <i>Communicated by Professor A. G. Mackie</i> . . . . .	226

NO	PAGE
19*	239
Concavity and the Evolutionary Properties of a Class of General Materials. By R. N. Hills and R. J. Knops, Heriot-Watt University, Edinburgh. <i>Communicated by Professor A. Jeffrey</i>	
20	245
On the Limit-point and Limit-circle Theory of Second-order Differential Equations. By K. S. Ong, Department of Mathematics, University of Toronto. <i>Communicated by Professor W. N. Everitt</i>	
21*	257
Asymptotic Evaluation of certain Integral Formulae for Ellipsoidal Wave Functions. By B. A. Hargrave, Department of Mathematics, University of Aberdeen, and B. D. Sleeman, Department of Mathematics, University of Dundee. <i>Communicated by Professor C. St J. A. Nash-Williams</i>	
22	271
On the Non-existence of Solutions to the Generalised Swirling Flow Problem. By P. J. Bushell, Mathematics Division, University of Sussex. <i>Communicated by Dr J. B. McLeod</i>	
23*	275
Weak Continuity Properties of Mappings and Semigroups. By J. M. Ball, Heriot-Watt University, Edinburgh. <i>Communicated by Professor W. N. Everitt</i>	
24	281
On the Question of the Deficiency Indices of Differential Operators with Complex Coefficients. By V. I. Kogan and F. S. Rofe-Beketov, Kharkov, USSR. <i>Communicated by Professor W. N. Everitt</i>	
25	299
Spectrum of a Third-order Differential Operator with Large Coefficients. By K. Unsworth, Department of Aeronautics, Imperial College of Science and Technology, London. <i>Communicated by Professor W. N. Everitt</i>	
26	307
Singularities of Solutions of Certain Plane Autonomous Systems. By Russell A. Smith, Department of Mathematics, University of Durham. <i>Communicated by Professor W. N. Everitt</i>	
27	317
Generating Sets for Fuchsian Groups. By J. H. H. Chalk and B. G. A. Kelly, University of Toronto. <i>Communicated by Professor W. N. Everitt</i>	
28	327
Growth of Solutions of Algebraic Equations with Coefficients in a Group. By V. Marić, University of Novi Sad, Yugoslavia and Istituto Matematico 'Ulisse Dini', Università di Firenze, and A. Sangalli, Istituto Matematico 'Ulisse Dini', Università di Firenze. <i>Communicated by Professor A. Jeffrey</i>	
29	331
Finiteness of the Order of Meromorphic Solutions of some Non-linear Ordinary Differential Equations. By Einar Hille, Department of Mathematics, University of California, San Diego, La Jolla. <i>Communicated by Professor W. N. Everitt</i>	
30*	337
Acoustic Diffraction by an Absorbing Semi-infinite Half Plane in a Moving Fluid. By A. D. Rawlins, Department of Mathematics, University of Dundee. <i>Communicated by Professor D. S. Jones</i>	
31	359
Spectral Manifolds for Constant Coefficient Elliptic Operators in $L^p(\mathbb{R}^n)$ . By M. Thompson, Mathematics Division, University of Sussex. <i>Communicated by Professor W. N. Everitt</i>	

\*The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the cost of these papers.

## INSTRUCTIONS TO AUTHORS (*continued*)

The overall space available for figures and plates is 250 × 175 mm. in *Transactions* and 200 × 125 mm. in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' corrections in excess of 5 per cent. of the printer's charges for the setting of a particular paper will be charged to the authors. Proofs should, if possible, be returned within one week to *The Secretary, The Royal Society of Edinburgh, 22 George Street, Edinburgh, EH2 2PQ*, and not to the printer. To prevent delay, authors who are abroad, should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

### MODEL INDEX

Houstoun, R. A.—A measurement of the velocity of light. *Proc. Roy. Soc. Edinb.*, A, 63, 1949–50, 95–104.  
Light, A measurement of the velocity of.

R. A. Houstoun. *Proc. Roy. Soc. Edinb.*, A, 63, 1949–50, 95–104.

Velocity of Light, A measurement of the.

R. A. Houstoun. *Proc. Roy. Soc. Edinb.*, A, 63, 1949–50, 95–104.

Authors are advised, before submitting papers, to consult *General Notes on the Preparation of Scientific Papers* (2nd Edn., 1965) (Royal Society of London), especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be consulted in the Library of The Royal Society of Edinburgh. Personal copies of the *General Notes* may be obtained, price 30p per copy, postage included, from the Executive Secretary, Royal Society of London, 6 Carlton House Terrace, London SW1Y 5AG.
