

Instructions to authors

Detailed instructions to authors are available online here:
[cambridge.org/core/journals/journal-of-glaciology/information](https://www.cambridge.org/core/journals/journal-of-glaciology/information)

The *Journal of Glaciology* publishes three types of paper:

- Articles - concerning new findings and theories, or new instruments and methods, in glaciology; or review articles that offer an up-to-date, coherent account of a glaciological subject that is developing rapidly or has been neglected
- Letters - identical in form and general content to Articles, but of reduced length, and carrying substantially reduced processing charges
- Communications - short pieces without abstracts that could be, e.g., comments on published articles/letters, book reviews, or short correspondence on topics of interest to the community

Papers submitted should be:

- of high scientific quality
- complete and clear
- substantially different from previously published work.

Length

Papers should be concise. Lines and pages should be numbered. Letters are limited to five *Journal* pages and Correspondences to two (one *Journal* page = about 1000 words).

Original submission

Submit your paper via the *Journal of Glaciology* online submission system at <https://mc.manuscriptcentral.com/jog>

Review process

Your paper will be peer reviewed by at least two reviewers. The Scientific Editor will discuss any alterations required to the paper. The Associate Chief Editor will inform you if and when your paper is accepted for publication. Papers written in poor English, not appropriate for the journal, or of inferior quality will be rejected without review.

You will be sent a proof of your text and illustrations to check and correct in advance of online publication.

Final submission

The final accepted version of the paper should be in electronic format.

- Acceptable formats are
 - Text (including tables and figure captions) – Word, rtf or LaTeX (the IGS class file should be used; downloadable from the website). Please also supply a final PDF
 - Figures – ideally in tif or eps format (or otherwise in the format in which they were created)
- Responsibility for the accuracy of all data (including references) rests with the authors

Supplementary material

The *Journal of Glaciology* accepts and makes available online appropriate supplementary material. It should be clearly named and labelled and provided in standard file formats.

General points

- Title should be concise
- Abstract should be less than 200 words

- Papers should be divided into numbered sections with short section headings
- Use SI units
- Use internationally recognized systems of abbreviation
- Illustrations should
 - be one or two column widths: up to 85 mm or up to 178 mm
 - not be in boxes
 - use strong black lines (avoid tinting if possible)
 - use SI units in labels
 - use Optima, Arial or a similar sans serif font in labels
- TeX authors: please provide a pdf of the whole paper (text, tables, figures and captions) as well as the individual LaTeX and graphics files
- Equations should
 - be set in MathType or advanced equation editor
 - NOT be embedded as graphics in the text
- Tables should
 - be numbered in Arabic
 - be referred to in text (as Table 1 etc.)
 - NOT be submitted as illustrations
- All citations in text should include the author name(s) and the year of publication (e.g. Smith, 2010; Smith and Jones, 2012; Smith and others, 2014) and must have an entry in the reference list
- Reference lists should
 - be concise
 - be complete and accurate, including doi numbers
 - be provided in precise *Journal* format, including punctuation and emphasis (see past papers for style)
 - be arranged in alphabetical order by first author's surname
 - include works accepted but not published as 'in press'
 - not include personal communications, unpublished data or manuscripts in preparation or submitted for publication (these should be included in the text)

Open Access and page charges

As a gold open access journal, the *Journal of Glaciology* is published without restriction and receives no subscription revenue. The costs of publication are instead covered by an article publishing charge (APC) levied upon the corresponding author, or his/her funding body or institution.

The APC for non-IGS members is £1,320 for a regular article (of 6 published pages or more), £660 for a letter (of 5 published pages or fewer) and £300 for a communication (of 2 published pages or fewer). IGS members receive a 10% discount on these charges.

Figures quoted here are correct for 2020.

Upon acceptance for publication the corresponding author will be contacted by Rightslink on behalf of Cambridge University Press, who will administer the collection of the article publishing charge. At that stage the corresponding author can pay by credit card or arrange for an invoice to be issued to his/her funding body or institution. Selected authors may be granted an APC waiver by the IGS. In such cases, a waiver code shall be provided, which should be issued to Rightslink upon receipt of the payment.

Journal of GLACIOLOGY

CONTENTS Vol 66 No 257 2020

349–361 Can unconfined ice shelves provide buttressing via hoop stresses?

Martin G. Wearing, Jonathan Kingslake, M. Grae Worster

362–372 Over-winter persistence of supraglacial lakes on the Greenland Ice Sheet: results and insights from a new model

Robert Law, Neil Arnold, Corinne Benedek, Marco Tedesco, Alison Banwell, Ian Willis

373–385 Bayesian calibration of an avalanche model from autocorrelated measurements along the flow: application to velocities extracted from photogrammetric images

María Belén Heredia, Nicolas Eckert, Clémentine Prieur, Emmanuel Thibert

386–400 Modelling spatial patterns of near-surface air temperature over a decade of melt seasons on McCall Glacier, Alaska

Patrick Troxler, Álvaro Ayala, Thomas E. Shaw, Matt Nolan, Ben W. Brock, Francesca Pellicciotti

401–414 On the physical basis for the creep of ice: the high temperature regime

D.M. Cole

415–249 A non-local continuum poro-damage mechanics model for hydrofracturing of surface crevasses in grounded glaciers

Ravindra Duddu, Stephen Jiménez, Jeremy Bassis

430–446 Basal seismicity of the Northeast Greenland Ice Stream

Ian W. McBrearty, Lucas K. Zoet, Sridhar Anandakrishnan

447–456 Application of the radionuclide ^{210}Pb in glaciology – an overview

Heinz W. Gäggeler, Leonhard Tobler, Margit Schwikowski, Theo M. Jenk

457–470 Analysis of Antarctic Peninsula glacier frontal ablation rates with respect to iceberg melt-inferred variability in ocean conditions

M. C. Dryak, E. M. Enderlin

471–484 Estimating the longevity of glaciers in the Xinjiang region of the Tian Shan through observations of glacier area change since the Little Ice Age using high-resolution imagery

Julia Liu, Daniel E. Lawson, Robert L. Hawley, Jonathan Chipman, Brian Tracy, Xun Shi, Yaning Chen

485–495 Intermittent structural weakening and acceleration of the Thwaites Glacier Tongue between 2000 and 2018

B. W. J. Miles, C. R. Stokes, A. Jenkins, J. R. Jordan, S. S. R. Jamieson, G. H. Gudmundsson

496–508 Search and recovery of aircraft parts in ice-sheet crevasse fields using airborne and in situ geophysical sensors

Kenneth D. Mankoff, Dirk van As, Austin Lines, Thue Bording, Joshua Elliott, Rune Kraghede, Hubert Cantalloube, Hélène Oriot, Pascale Dubois-Fernandez, Olivier Ruault du Plessis, Anders Vest Christiansen, Esben Auken, Karina Hansen, William Colgan, Nanna B. Karlsson

509–519 Inferring geothermal heat flux from an ice-borehole temperature profile at Law Dome, East Antarctica

Laura Mony, Jason L. Roberts, Jacqueline A. Halpin

520–522 Comments on ‘Area changes of glaciers on active volcanoes in Latin America’ by Reinthaler and others (2019)

William Kochtitzky, Benjamin Edwards

Published for the International Glaciological Society, Cambridge, UK
