THE CLIMATE OF THE CONTINENT OF AFRICA

BY ALEXANDER KNOX, B.A. (CANTAB.), F.R.G.S.

Royal 8vo. With 13 maps and a diagram

Price 21s. net

"Such a work as this has not only become highly necessary, but should be in great demand amongst Governments, mining and commercial companies trading in Africa, missionary societies, and all individuals who intend to visit Africa for any length of time, or to settle in any part of that continent for purposes of health, science, education, or commercial gain... The maps contributed to this book by Mr J. G. Bartholomew under the direction of the author are admirable, and great praise must be awarded to the author for his general research, the clearness with which he sets forth his details and his conclusions, and the way in which he has invested what might seem to be a somewhat uninteresting subject with an interest and an importance sufficient to attract the general reader as well as the specialist. The book...should prove a standard work."—Sir H. H. JOHNSTON in *Nature*

TICKS A Monograph of the Ixodoidea

By GEORGE H. F. NUTTALL, M.D., PH.D., SC.D., F.R.S., CECIL WARBURTON, M.A., F.Z.S., W. F. COOPER, B.A., F.Z.S., F.L.S. and L. E. ROBINSON, A.R.C.Sc. (London)
