

## INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

# JOURNAL OF PLASMA PHYSICS

Volume 50 Part 2 October 1993

## CONTENTS

An analytical method for the investigation of instability of a collisionless plasma in strong magnetic fields V. U. ZAKHAROV	185
Magnetic-moment field generation in the reflection region in a cold magnetized plasma CHANDRA DAS, B. BERA, B. CHAKRABORTY AND MANORANJAN KHAN	191
Thermodynamic stability of a tokamak plasma M. BRUSATI AND A. DIVITA	201
Observation of modulational instability in a multi-component plasma with negative ions H. BAILUNG AND Y. NAKAMURA	231
The Bohm criterion in the presence of radio-frequency fields J. E. ALLEN AND M. A. SKORIK	243
Outline of a theory of lower-hybrid absorption E. CANOBBIO AND R. CROCI	251
Scintillations in a magnetized plasma. Part 1. The mutual coherence function D. B. MELROSE	267
Scintillations in a magnetized plasma. Part 2. The fourth-order moment D. B. MELROSE	283
Perturbation region near a biased body in a flowing collision-dominated plasma with low ionization density. Current-voltage characteristics of a Langmuir probe M. S. BENILOV	293
The neighbouring vibrating 'multiple water-bag' plasma potential and related aspects LIM CHEE-SENG	309
Effect of collisions on the magnetization current in a plasma G. BRODIN AND L. STENFLO	325
Excitation of ion-cyclotron waves by a spiralling ion beam in a plasma cylinder S. C. SHARMA AND V. K. TRIPATHI	331
Millimetre-wave second-harmonic generation in an underdense magnetoplasma in the presence of a magnetic wiggler JETENDRA PARASHAR, H. D. PANDEY, K. RAMACHANDRAN AND R. K. SINGH	339
Corrigendum S. H. KIM	345
