

INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website www.austms.org.au/Bulletin. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in L^AT_EX using $\mathcal{A}\mathcal{M}\mathcal{S}$ -L^AT_EX packages and submitted as a PDF file via our journal management system, at www.austms.org.au/Publications/Submissions/BAustMS. This permits authors to track their papers through the editorial process. Recent versions of T_EX are able to produce PDF files directly. A L^AT_EX class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at editor@bulletin.austms.org.au.

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification and Key Words. Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2020 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at www.ams.org/msc.

4. Abstracts of PhD Theses. The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Table of Contents

On the Cayleyness of Praeger–Xu graphs <i>Barbieri, M., Grazian, V. & Spiga, P.</i>	353
A note on the singularity of oriented graphs <i>Ma, X. & Jiang, F.</i>	357
Binary signed-digit representations in paperfolding <i>Bates, B., Bunder, M. & Tognetti, K.</i>	363
On linearised polynomials, Sidon arrays and fast construction of Sidon sets <i>Andrade, C., Bermudez, Y. & Trujillo, C.</i>	376
Alternating circular sums of binomial coefficients <i>Chu, W.</i>	385
On the inhomogeneous Vinogradov system <i>Brandes, J. & Hughes, K.</i>	396
Solvability of a system of polynomial equations modulo primes <i>Järvinen, O.</i>	404
Extreme values of the Rankin–Selberg L-functions <i>Cui, C. & Yang, Q.</i>	408
Distribution of elements of a floor function set in arithmetical progressions <i>Yu, Y. & Wu, J.</i>	419
Averages of exponential twists of the von Mangoldt function <i>Ren, X. M. & Zhang, W.</i>	425
On the parity of the generalised Frobenius partition functions $\phi_k(n)$ <i>Andrews, G. E., Sellers, J. A. & Soufan, F.</i>	431
Reciprocal monogenic quintinomials of degree 2" <i>Jones, L.</i>	437
Factoring variants of Chebyshev polynomials with minimal polynomials of $\cos(2\pi/d)$ <i>Wolfram, D. A.</i>	448
Primitive element pairs with a prescribed trace in the cubic extension of a finite field <i>Booker, A. R., Cohen, S. D., Leong, N. & Trudgian, T.</i>	458
Conjugacy classes of maximal cyclic subgroups and nilpotence class of p-groups <i>Bianchi, M., Camina, R. D. & Lewis, M. L.</i>	463
On fractal dimensions of fractal functions using function spaces <i>Chandra, S. & Abbas, S.</i>	470
L^p regularity of the Szegő projection on the symmetrised polydisc <i>Han, K. & Tang, Y.</i>	481
Translating solitons for the mean curvature flow in $\mathbb{R}^4$ <i>Lee, H.</i>	491
A continuous homomorphism of a thin set onto a fat set <i>Chalebgwa, T. P. & Morris, S. A.</i>	500
Lifting homeomorphisms and finite abelian branched covers of the 2-sphere <i>Chen, H.-M.</i>	504
Abstracts of PhD Theses	
Sylow classes of reflection subgroups and pseudo-Levi subgroups <i>Townsend, K. D.</i>	508
Convergence rate for statistics of point processes <i>Cong, T.</i>	511
Stochastic processes with applications in physics and insurance <i>He, Y.</i>	513
On asymptotic properties of nonlinear functionals of random fields <i>Donhauzer, I.</i>	518
A comprehensive study of option pricing with transaction costs <i>Yan, D.</i>	522
Author Index for Volume 106	525
