

## **The Common Law in the Sudan**

An Account of the 'Justice, Equity, and Good Conscience' Provision

**Z. MUSTAFA**

This is the first comprehensive and analytical survey of the substantive civil law now applied by the Sudan courts. By reference to published and unpublished documents, and to many unreported cases, the background of English law is examined; and the salient features of the Sudan law, with its peculiarities and anomalies, are defined. This is an essential work for all those interested in the development and working of African legal systems. Scholars in jurisprudence will find in it many valid illustrations of judicial law-making and the influence of economic, political, and social considerations on the shaping of legal rules. £3.50

## **Public Law and Political Change in Kenya**

A Study of the Legal Framework of Government from Colonial Times to the Present

**Y. P. GHAI and J. P. W. B. MCAUSLAN**

The authors have carried out an intensive study of the colonial administrative machinery, beginning with the days of the Imperial British East Africa Company at the turn of the 19th century; of how this was affected by political change in Kenya; and how, since independence, legal and administrative methods are still linked to those of the colonial period. The over-all picture is one of a marked historical continuity in the application of the law and methods of administration through both periods. £6.75 *OUP Eastern Africa*
