Animal Health Research Reviews provides an international forum for the publication of reviews and commentaries on all aspects of animal health. The journal covers all facets of animal health and science, including but not limited to both infectious and non-infectious diseases in domestic and wild animals.

Senior Editor

David J. Middleton, Royal Botanic Garden, Edinburgh, UK

Edinburgh Journal of Botany is an international journal of plant systematics and related aspects of biodiversity, conservation and phytogeography. It covers plants and fungi in all geographic areas. Papers linking traditional and modern taxonomic techniques are especially encouraged. Commissioned book reviews and review articles are also included.

Managing Editor

Norman Noah, London School of Hygiene and Tropical
Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Emphasis is given to the epidemiology, prevention and control of infectious diseases, but coverage includes microbiology, virology, immunology, tropical infections, food hygiene, statistics and the clinical, social and public-health aspects of disease.

Parasitology publishes original papers on all aspects of parasitology and host-parasite relationships, ranging from the latest discoveries in biochemical and molecular biology to ecology and epidemiology in the context of the medical, veterinary and biological sciences.

Two specially commissioned issues with important topics in parasitology, including the proceedings of the symposia of the British Society for Parasitology, are included in the annual subscription.

Editor-in-chief

Robert Koeber, Norwich, UK

Plant Genetic Resources is an international journal that brings together the many diverse topics concerned with plant genetic resources. Each issue gives you access to peer-reviewed research papers on genetic variation in plants, both crop and non-crop, as well as on the technical, socio-economic, legal and geo-political aspects of PGR. Many papers feature research directed to endangered non-crop and medicinal plants. The journal is of interest to researchers and scientists involved in the plant genetic resources community, including: breeders, all those with an interest in germplasm, policy makers, consultants and research students.

NOTES FOR AUTHORS

Journal of Helminthology provides an international vehicle for the publication of original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts including plant and insect parasites will also be welcome. Taxonomic contributions will be acceptable if they contribute to the systematics of a group and particularly if they employ biochemical or molecular biological techniques.

Ethics

The authors must demonstrate the experimental procedures employed conform to the accepted principles of animal welfare in experimental science. The principles defined and explained in the European Convention for the Protection of Vertebrate Animals used for Experimental and Other Scientific Purposes and its appendix and/or the National Research Council Guide for the Care and Use of Laboratory Animals should be followed. If experimental methodology raises particular ethical or welfare concerns then the Editor will take additional guidance from Animals (Scientific Procedures) Act 1986, when making decisions. The Editor's decision with regard to ethics will be final.

Page format. The *Journal* is printed in a two-column format (column width of 80 mm) with a text area of 170 × 225 mm.

Text. Papers should be typed single column, with double line spacing on one side of the paper only with ample margins on all sides. *Italic* should be used for taxonomic nomenclature and bold for headings. Standard abbreviations (e.g. fig. and figs) and metric units must be used. Use British rather than American spellings. Use 'z' rather than 's' spellings in words with 'ize'.

Abstract. Each paper must commence with an accurate, informative abstract in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title should be provided as a running head.

Tables. Tables should be reduced to the simplest form and present only essential data. The use of vertical rules should be avoided whenever possible.

Line drawings

These should be sharp and clear, black ink on white paper. Computer generated figures and graphs should not contain grey tints or complicated hatching. Figures should be supplied at preferred size to fit single column, double column, or landscape (if absolutely necessary) with clear lettering. No bold should be used.

Half-tone photographs

Black and white half-tone photographs are acceptable where they are a real contribution to the text. They should be prints of good quality at the intended final size with any required lettering or numbering inserted by the author.

Voucher specimens. The deposition of voucher specimens should be considered where appropriate.

References. References must be based on the name and year system, give full journal titles and conform to the following styles:

Bailey, N.T.J. (1995) *Statistical methods in biology*. 3rd edn. 255 pp. Cambridge, Cambridge University Press.

Molloy, S., Holland, C. & O'Regan, M. (1995) Population biology of *Pomphorhynchus laevis* in brown trout from two lakes in the west of Ireland. *Journal of Helminthology* **69**, 229–235.

Sanderson, C.J. (1993) Cytokines active on eosinophils. pp. 274–283 in Makino, S. & Fukuda, T. (Eds) *Eosinophils: biological and clinical aspects*. Boca Raton, CRC Press.

Citation of authors in the text should appear in the form: Polaszek (1996) or (Polaszek, 1996). Authors should be cited in chronological order as: (Blackman *et al.*, 1994; Roberts & Kumar, 1995).

Proofs. Authors will receive a pdf file of page proofs by email.

Offprints. If you wish to purchase paper offprints of your article, complete the offprint order form and return with your corrected proof. Orders must be received before the issue has gone to press. Authors will receive a pdf of their article via email.

Copyright. Authors can download copyright forms from the Notes for Authors section at www.cambridge.org/jhl. Please send a hardcopy of the signed form to: JOH Production Editor, The Edinburgh building, Shaftesbury Road, Cambridge, CB2 8RU. Papers are accepted on the understanding that the work has not been submitted or published elsewhere unless stated.

Manuscripts. An electronic version, preferably in Microsoft Word, should be submitted to jhelmeditor@cambridge.org.

Online manuscript submission and peer review will be available from spring 2006.
