

## THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of one or more of *The Mathematical Gazette*, *Mathematics in School*, *Primary Mathematics* (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced rate. Those interested in becoming members should contact MA Headquarters for information and application forms. The address of the Association Headquarters is **Charnwood Building, Holywell Park, Loughborough University Science and Enterprise Park, Leicestershire LE11 3AQ, UK (telephone 0116 221 0013)**. The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to **Teaching Committee** should be addressed to TC Chair. The **Association's Library** is housed in the University Library, Leicester.

Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

## THE MATHEMATICAL GAZETTE

### *Editor:*

Dr Gerry Leversha,  
15 Maunder Road,  
Hanwell,  
London W7 3PN  
*g.leversha@btinternet.com*

### *Problem Corner:*

Mr Chris Starr,  
c/o Kintail,  
Longmorn,  
Elgin IV30 8RJ  
*czqstarr@gmail.com*

### *Production Editor:*

Mr Bill Richardson,  
Kintail,  
Longmorn,  
Elgin IV30 8RJ  
*wpr3145@gmail.com*

### *Reviews Editor:*

Mr Owen Toller,  
4 Caldwell House,  
48 Trinity Church Road,  
London SW13 8EJ  
*owen.toller@btinternet.com*

Potential advertisers e-mail Charlotte Dyason at: *charlotted@media-shed.co.uk*

Material for publication should be sent to the Editor.

Books for review should be sent to the Reviews Editor.

### *Advice to authors of notes and articles.*

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS may be submitted electronically, preferably in pdf format, or, if sent by post, should be typed and two copies included. (Mathematical expressions may be hand written.) Please send electronic files by e-mail. This edition of the *Gazette* was produced on an Acorn machine using TechWriter and Draw.

10.1017/mag.2025.10118

## CONTENTS (continued)

### Notes 109.16 to 109.31

PWW (Proof Without Words): The largest side of a triangle corresponds to the smallest median	<i>Victor Oxman</i>	316
Covering a Hex Number with Octagonal Numbers	<i>Günhan Caglayan</i>	316
Transitivity, transpositions and permutation groups	<i>George Stoica</i>	317
An explicit formula for averaging sequences	<i>Kasidet Joohong, Thanatkrit Kaewtem</i>	319
Less than equable triangles on the Eisenstein lattice	<i>Christian Aebi, Grant Cairns</i>	325
$e = 2.71828$ (to 6 significant figures): An elementary demonstration	<i>K. B. Subramaniam, Amarnath Murthy</i>	330
A constant function	<i>Mehdi Hassani</i>	331
The derivative of the integral, redux	<i>George Stoica</i>	332
On a couple of simple quadratic inequalities	<i>Mehdi Hassani</i>	334
Generalisation of an algebraic inequality	<i>Rajib Mukherjee</i>	337
A simple self-improvement of the Cauchy-Schwarz inequality	<i>Reza Farhadian, Vadim Ponomarenko</i>	338
A weighted Hölder's inequality	<i>Kambiz Razminia</i>	341
A trick with the gamma function	<i>Hollis Williams</i>	342
Reverse of the Weitzenböck inequality	<i>Wei-Dong Jiang</i>	345
A generalisation of Sylvester's theorem with an application	<i>Quang Hung Tran</i>	347
Did Tindley know the Archimedean property of $\mathbb{R}$ ?	<i>Bikash Chakraborty</i>	352

### Feedback

Colin Foster writes: In [1], Paul Belcher . . .	<i>Colin Foster</i>	353

# CONTENTS

## Articles

Approximation of the value of $\pi$ using metallic means and the unit hyperbola	<i>Luděk Spíchal</i>	193
Hunt for solutions to a problem of Euler	<i>Kapil Joshi</i>	199
Sums of sums of geometric and related series	<i>J. R. Nurcombe</i>	209
Odd run sums and fractions	<i>Ron Knott</i>	217
Visualizing alternating geometric series	<i>Michael Waters, Ritam Sinha</i>	223
Questions arising from a duality between the median triangle theorem and a theorem of Pompeiu	<i>Mowaffaq Hajja Panagiotis T. Krasopoulos</i>	231
A caution (or two) regarding mathematical expectation	<i>Leonard M. Wapner</i>	247
The most concise recurrence formula for the sums of integer powers	<i>José Luis Cereceda</i>	253
The Euler numbers and their last digits	<i>Warren P. Johnson</i>	259
Variations of Vecten configurations	<i>Hans Humenberger, Michael de Villiers</i>	265
Generalisation of an IMO geometry problem	<i>Dina Kamber Hamzić, László Németh, Zenan Šabanac</i>	273
Measures of unequilaterality and refinements of inequalities	<i>Martin Lukarevski, Dan Stefan Marinescu</i>	281
Five mathematical gobbets	<i>Nick Lord</i>	286
On HAP triangles	<i>Emrys Read</i>	294
The Australian shuffle and two self-working card tricks	<i>Anita A. Gaenko, Michael A. Jones, Vaneesha Natogi, Alex Swanson, Anirudh S. Venkat, Khoi M. Vu</i>	303
The three centroids of a polygonal lamina	<i>A. F. Beardon</i>	308
