

Information for Contributors

1. Manuscripts must be written in English. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Associate Editor or the Editor.
2. The typescript should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.
3. The title and section headings should highlight the significant points. A short abstract should precede the main text.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables.
7. References and footnotes should be cited according to the Harvard (Author/date system), also known as the "British form". In the text, author and year are cited in brackets e.g. "... was found by McCarthy (1980; 1980a) ..." or "(Emmett *et al.* 1972)". Full references are listed in alphabetic order at the end of the paper. References are not numbered. An example of a reference list is:
DEUTSCH, C. & KLARSFELD, S. 1973 *Phys. Rev.* **A7**, 2081.
NICHOLSON, D. R. 1983 *Plasma Theory*, (John Wiley, New York).
OOMURA, H. *et al.* 1982 *Res. Rep ILE*, ILE-8207p.
OOMURA, H. *et al.* 1982a *Trans. ANS*, **43**, 617.
Note that the year of publication appears after the author's name. If possible, all authors names should be listed in preference to "*et al.*" If one author or team is referred to more than once in any year, the letters a, b, etc should be added after the year to distinguish the individual references.
8. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

LASER AND PARTICLE BEAMS

Volume 4 Part 2 May 1986

CONTENTS

A. E. Pozwolski: Fusion by hypervelocity impact 157

Zhou Xuehua, Chen Liyin and Chen Haitao: Characteristics of a CW/HF chemical laser calculated from a simplified two-dimensional model 167

J.-M. Dolique: Bremsstrahlung collision contribution to entropy generation and attendant radial expansion in a self-pinched high-power relativistic electron beam propagating in a neutral gas 183

E. J. Lerner: Magnetic self-compression in laboratory plasmas, quasars and radio galaxies.—Part I 193

E. J. Lerner: Magnetic self-compression in laboratory plasmas, quasars and radio galaxies.—Part II 215

Lin Zunqui, Tan Weihan, GuMin, Mei Guang, Pan Chengming, Yu Wenyan and Deng Ximing: Temporal and spectral features of the $(3/2) \omega_0$ spatial fine structure in laser irradiated planar targets 223

Tan Weihan, Yu Wenyan, Lin Zunqui, Bi Wiji, Deng Ximing and Ding Liming: Resonance absorption initiated by self focusing filamentation 231

R. Dinger, K. Rohr and H. Weber: Plasma ion spectra from laser produced plasmas at $\lambda = 1.06 \mu\text{m}$ and $\lambda = 0.53 \mu\text{m}$ 239

S. Eliezer and A. Loels: Two dimensional analytical considerations of large magnetic and electric fields in laser produced plasmas 249

P. Stroud: Streaming modes in final beam transport for heavy ion beam fusion 261

Bekir Sami Yilbas: Heating of metals at a free surface by laser irradiation—An electron kinetic theory approach 275

K. A. Long and N. A. Tahir: Plasma induced energy deposition and radiation transport effects in ion beam heated plane metal targets and analytic solutions of the non-linear radiation conduction equation 287
