March 1939: The British Guarantee to Poland

A Study in the Continuity
of British Foreign Policy

Simon K. Newman

This book examines the origin and consequences of the British guarantee to Poland in March 1939. The author analyses the Chamberlain Government's efforts both to achieve a settlement on its own terms with Germany and to counter the extension of German power in central and south-eastern Europe. There is a detailed account of the domestic, strategic, and international political factors influencing British policy during the tense weeks leading up to the announcement of the guarantee, and a discussion of its significance in relation to the outbreak of war. £6.50

Party Dynamics

The Democratic Coalition
and the Politics of Change

Richard L. Rubin

The Democrats' overwhelming defeat in the 1972 U.S. presidential election was the culmination of a growing weakness of the coalition of groups (such as labour, urban residents, Catholics) that traditionally made up the party. Richard Rubin examines that coalition, the elite or activist groups that have now come into prominence, the interaction between elite and rank-and-file, and the change resulting from that interaction. £5.95

North West Africa

A Political and Economic Survey

Wilfrid Knapp

Since 1962, when the second edition of this survey appeared, North West Africa has undergone a radical transformation. In consequence the text has been almost completely rewritten. Mr. Knapp examines the political structure of Bourguiba's Tunisia, the ideology and politics of Libya, the attempts at single-party mobilization in Algeria and Mauritania, and the modernization of the Moroccan monarchy. Third edition £12.50

COHESION AND CONFLICT

Lessons from the Study of
Three-Party Interaction

David Wilkinson

This study, a contribution to the field of conflict research, is concerned with the *triad*, or group of three interacting decision makers. The *triad* is studied as the simplest prototype of a multi-person interaction; it is analysed to throw light on more general problems, where the number of decision makers is larger, or where the decision makers are collective entities such as nations. The method of analysis is by means of mathematical models.

Previous work on *triads* from several relevant disciplines, such as Sociology, Behavioural Science, and Politics, is surveyed, integrated, and assessed. This survey includes not only theoretical models, but also the results of experiments with the *triad*.

EPICUREAN POLITICAL PHILOSOPHY

James H. Nichols, Jr

This book reveals new dimensions of thought in the teachings of the Greek philosopher Epicurus and the writings of the Roman poet Lucretius. Through a rigorous analysis of the form and substance of Lucretius' poem, *De rerum natura*, Mr Nichols sets forth the character of Epicurean philosophy, focusing particularly on Lucretius' political and moral understanding. He offers a new interpretation of Lucretius' view of the character of human happiness in relation to the truth about the whole universe, the nature of society, and the effect of religion.

ROUSSEAU'S POLITICAL PHILOSOPHY

An Interpretation from Within

Stephen Ellenburg

Taking issue with customary approaches to Rousseau, this book demonstrates the underlying unity of his thought and its fundamental meaning. Mr Ellenburg illuminates all of Rousseau's writings, explicating a score of troublesome and seemingly contradictory passages. He uncovers subtle and intimate relationships among the *Discourse on Inequality*, the *Social Contract*, and *Emile*. "Charting the course of Rousseau's ideas," he writes, "I find that his political writings echo and re-echo within each other; there is no shift of direction in successive writings." With scrupulous care he brings out the forms of social and political unity that Rousseau regarded as compatible with genuine individuality.
