The only percutaneous device dressing proven to reduce the incidence of **CRBSI and local infections**¹

BIOPATCH Dressing is specifically designed to inhibit bacterial growth around all percutaneous devices, including catheters and orthopedic pins.

Powerful protection... Powerful proof.

- BIOPATCH Dressing provides protection against a broad spectrum of bacteria including resistant strains MRSA and VRE, as well as *Candida albicans*.
- In a controlled, randomized trial, use of BIOPATCH Dressing resulted in a reduction in the incidence of CRBSI and local infections as compared with standard care.¹

Introducing the first alcohol-free chlorhexidine gluconate skin prep in a full-size cloth.

Sage® 2% Chlorhexidine Gluconate¹ Cloths

Fast-acting. Broad-spectrum. Persistent. We've taken the best attributes of CHG and made them easier than ever to apply. Our exclusive cloth removes debris and organic matter—while distributing a uniform dose of CHG to the skin. No drips, runs, spills or pooling associated with other skin preps.

Rinse-free. Quick-drying. Proven effective. Our patent-pending formulation exceeds all FDA requirements for antimicrobial efficacy.² And it does all this without alcohol or harsh detergents. No flammability concerns. Less risk of drying out skin. Just effective, skin-friendly bactericidal action.

Feared by bugs. Loved by skin.
