**Publisher:** Katy Christomanou

**Special sales and supplements:**

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Sarah Maddox at the Cambridge address for further details. E-mail: [special\\_sales@cambridge.org](mailto:special_sales@cambridge.org)

**Subscription information:**

*British Journal of Nutrition* is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2012 comprise Volume 107, the twelve issues starting July 2012 comprise Volume 108.

**Annual subscription rates:**

Volumes 107/108 (24 issues):  
Internet/print package £1113/\$2169/€1782  
Internet only: £877/\$1710/€1401  
Print only: £1060/\$2067/€1723

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

**Back volumes** are available. Please contact Cambridge University Press for further information.

**Claims** for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

**US POSTMASTERS:** please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

**Directions to Contributors** are available from the Society at the address below or can be found on the Society's website at <http://www.nutrition society.org> (an abbreviated Notes for Authors can be found inside the back cover).

**Offprints:** The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

**Copyright:** As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

# Public Health Nutrition

Published on behalf of The Nutrition Society

**Editor-in-Chief**

Agneta Yngve, Akershus University College, Norway

*Public Health Nutrition* provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to, nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

# Nutrition Research Reviews

Published on behalf of The Nutrition Society

**Editor-in-Chief**

Graham C. Burdge, University of Southampton, UK

*Nutrition Research Reviews* offers a comprehensive overview of nutritional science today. By distilling the latest research and linking it to established practice, the journal consistently delivers the widest range of in-depth articles in the field of nutritional science and has done so for the past twenty-one years. It presents up-to-date, concise and critical reviews of key topics in nutrition science, advancing new concepts and hypotheses that encourage the exchange of fundamental ideas on nutritional well-being in both humans and animals.

# *British Journal of Nutrition*

## Directions to Contributors - Concise Version

(Revised August 2007)

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition.society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or [edoffice@nutsoc.org.uk](mailto:edoffice@nutsoc.org.uk) (email).

**Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition.society.org>). All relevant financial interests should be declared.**

**Text.** Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

**Title Page.** The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

**Abstract.** Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

**Tables.** Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

**Illustrations.** The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

**References.** References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhabonticum*) stalk fibre stimulates cholesterol 7 $\alpha$ -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.

Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.

Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.

Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted<sup>(1,2-4)</sup>'. If a reference is cited more than once the same number should be used each time.

**Referees.** Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

**Proofs.** PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email [bjnproduction@cambridge.org](mailto:bjnproduction@cambridge.org)

**Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). Authors should submit to the following address: <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.**

**Short Communication**

- SNP may modify the effect of vitamin A supplementation at birth on cytokine production in a whole blood culture assay.  
M. J. Jørgensen, A. B. Fisker, C. Erikstrup, M. H. Claesson & C. S. Benn 615–620

**Molecular Nutrition**

- Up-regulation of intestinal type 1 taste receptor 3 and sodium glucose luminal transporter-1 expression and increased sucrose intake in mice lacking gut microbiota.  
T. D. Swartz, F. A. Duca, T. de Wouters, Y. Sakar & M. Covasa 621–630
- The anti-metastatic efficacy of  $\beta$ -ionone and the possible mechanisms of action in human hepatocarcinoma SK-Hep-1 cells.  
C.-S. Huang, S.-C. Lyu, J.-Y. Chen & M.-L. Hu 631–638
- Protective effects of fractional extracts from *Panellus serotinus* on non-alcoholic fatty liver disease in obese, diabetic *db/db* mice.  
M. Inafuku, K. Nagao, S. Nomura, B. Shirouchi, N. Inoue, N. Nagamori, H. Nakayama, T. Toda & T. Yanagita 639–646

**Metabolism and Metabolic Studies**

- Rat liver mitochondrial membrane characteristics and mitochondrial functions are more profoundly altered by dietary lipid quantity than by dietary lipid quality: effect of different nutritional lipid patterns.  
M. Aoun, C. Feillet-Coudray, G. Fouret, B. Chabi, D. Crouzier, C. Ferreri, C. Chatgililoglu, C. Wrutniak-Cabello, J. P. Cristol, M.-A. Carboneau & C. Coudray 647–659
- Effects of linseed consumption for a short period of time on lipid profile and atherosclerotic lesions in rabbits fed a hypercholesterolaemic diet.  
C. R. Prim, L. A. V. Baroncini, L. B. Prêcoma, P. H. L. Caron, G. Winter, M. O. Dall'Oglio Poletti & D. B. Prêcoma 660–664

**Developmental Biology**

- Protein restriction during pregnancy induces hypertension in adult female rat offspring – influence of oestradiol.  
K. Sathishkumar, R. Elkins, U. Yallampalli & C. Yallampalli 665–673

**Nutritional Endocrinology**

- Prolonged high iodine intake is associated with inhibition of type 2 deiodinase activity in pituitary and elevation of serum thyrotropin levels.  
N. Li, Y. Jiang, Z. Shan & W. Teng 674–682

**Nutritional Toxicology**

- Effects of pomegranate extracts on cartilage, bone and mesenchymal cells of mouse fetuses.  
M. Monsefi, F. Parvin & T. Talaei-Khozani 683–690
- Studies with low micromolar levels of ascorbic and dehydroascorbic acid fail to unravel a preferential route for vitamin C uptake and accumulation in U937 cells.  
C. Azzolini, M. Fiorani, A. Guidarelli & O. Cantoni 691–696

**Human and Clinical Nutrition**

- Fish intake, erythrocyte *n*-3 fatty acid status and metabolic health in Danish adolescent girls and boys.  
L. Lauritzen, L. B. S. Harsløf, L. I. Hellgren, M. H. Pedersen, C. Mølgaard & K. F. Michaelsen 697–704
- Effect of the Mediterranean diet with and without weight loss on surrogate markers of cholesterol homeostasis in men with the metabolic syndrome.  
C. Richard, P. Couture, S. Desroches, S. Benjannet, N. G. Seidah, A. H. Lichtenstein & B. Lamarche 705–711
- Effects of a Chinese medical herbs complex on cellular immunity and toxicity-related conditions of breast cancer patients.  
S. R. Zhuang, H. F. Chiu, S. L. Chen, J. H. Tsai, M. Y. Lee, H. S. Lee, Y. C. Shen, Y. Y. Yan, G. T. Shane & C.-K. Wang 712–718
- Glycaemic response to barley porridge varying in dietary fibre content.  
P. S. Thondre, K. Wang, A. J. Rosenthal & C. J. K. Henry 719–724
- The effects of 12-week psyllium fibre supplementation or healthy diet on blood pressure and arterial stiffness in overweight and obese individuals.  
S. Pal, A. Khossousi, C. Binns, S. Dhaliwal & S. Radavelli-Bagatini 725–734
- Effects of dietary *n*-3 and *n*-6 fatty acids on clinical outcome in a porcine model on post-operative infection.  
S. N. Langerhuus, E. K. Tønnesen, K. H. Jensen, B. M. Damgaard, U. Halekoh & C. Lauridsen 735–743
- DNA methylation and cognitive functioning in healthy older adults.  
O. J. G. Schiepers, M. P. J. van Boxtel, R. H. M. de Groot, J. Jolles, F. J. Kok, P. Verhoef & J. Durga 744–748
- Beneficial effects of catechin-rich green tea and inulin on the body composition of overweight adults.  
H.-Y. Yang, S.-C. Yang, J. C.-J. Chao & J.-R. Chen 749–754

**Dietary Surveys and Nutritional Epidemiology**

- Vitamin D status among adolescents in Europe: the Healthy Lifestyle in Europe by Nutrition in Adolescence study.  
M. González-Gross, J. Valtueña, C. Breidenassel, L. A. Moreno, M. Ferrari, M. Kersting, S. De Henauw, F. Gottrand, E. Azzini, K. Widhalm, A. Kafatos, Y. Manios, P. Stehle & on behalf of the HELENA Study Group 755–764

**Letter to the Editor**

- Banana as a relevant source of anthocyani(di)ns in European populations?  
C. Drossard & M. Kersting 765–766
- Response: Banana is not a food source of delphinidi(di)ns in the EPIC study.  
R. Zamora-Ros, V. Knaze & C. A. González 767
