

CONTENTS

Volume 48 Number 1

Research Papers

- 1 ANGELOS DASSIOS AND SHANLE WU. Double-barrier Parisian options
21 KATSUMASA NISHIDE AND L. C. G. ROGERS. Optimal time to exchange two baskets
31 NADER EBRAHIMI. Assessing the reliability function of nanocomponents
43 NEERAJ MISRA, AMIT KUMAR MISRA AND ISHWARI DUTT DHARIYAL. Standby redundancy allocations in series and parallel systems
56 F. G. BADIA. Hazard rate properties of a general counting process stopped at an independent random time
68 N. S. WALTON. Utility optimization in congested queueing networks
90 KONSTANTIN AVRACHENKOV, ALEXEY PIUNOVSKIY AND YI ZHANG. Asymptotic fluid optimality and efficiency of the tracking policy for bandwidth-sharing networks
114 PETER W. GLYNN AND MICHEL MANDJES. Simulation-based computation of the workload correlation function in a Lévy-driven queue
131 RUDOLF GRÜBEL AND HENDRIK WEGENER. Matchmaking and testing for exponentiality in the $M/G/\infty$ queue
145 CHIHOON LEE. On the return time for a reflected fractional Brownian motion process on the positive orthant
154 CHANG-LONG YAO, GE CHEN AND TIAN-DE GUO. Large deviations for the graph distance in supercritical continuum percolation
173 SIMON E. F. SPENCER AND PHILIP D. O'NEILL. The probability of containment for multitype branching process models for emerging epidemics
189 R. T. SMYTHE. Generalized coupon collection: the superlinear case
200 E. J. BAURDOUX AND K. VAN SCHAİK. Further calculations for the McKean stochastic game for a spectrally negative Lévy process: from a point to an interval
217 MARK S. VEILLETTE AND MURAD S. TAQQU. A technique for computing the PDFs and CDFs of nonnegative infinitely divisible random variables
238 KEN R. DUFFY, CLAUDIO MACCI AND GIOVANNI LUCA TORRISI. Sample path large deviations for order statistics
258 JI HWAN CHA AND MAXIM FINKELSTEIN. On new classes of extreme shock models and some generalizations
271 SUBHASH KOCHAR AND MAOCHAO XU. On the skewness of order statistics in multiple-outlier models

Short Communications

- 285 PATRICK FAYARD AND TIMOTHY R. FIELD. Discrete models for scattering populations
293 RHONDA RIGHTER. Stochastic comparison of discounted rewards

Research Papers

- 295 ANDREAS LÖPKER AND WOLFGANG STADJE. Hitting times and the running maximum of Markovian growth-collapse processes
- 313 WOLFGANG P. ANGERER. New limiting distributions for Bellman–Harris processes
- 322 AMINE ASSELAH, PABLO A. FERRARI AND PABLO GROISMAN. Quasistationary distributions and Fleming–Viot processes in finite spaces
- 333 TERTULIANO FRANCO, ADRIANA NEUMANN AND GLAUCO VALLE. Hydrodynamic limit for a type of exclusion process with slow bonds in dimension $d \geq 2$
- 352 N. LANCHIER. Contact process with destruction of cubes and hyperplanes: forest fires versus tornadoes
- 366 ECKHARD SCHLEMM. On the Markov transition kernels for first passage percolation on the ladder
- 389 PETER TANKOV. Improved Fréchet bounds and model-free pricing of multi-asset options
- 404 YINGHUI DONG, GUOJING WANG AND RONG WU. Pricing the zero-coupon bond and its fair premium under a structural credit risk model with jumps
- 420 PETER J. THOMAS. A lower bound for the first passage time density of the suprathreshold Ornstein–Uhlenbeck process
- 435 JUNG HYUN KIM, HYUN-SOO AHN AND RHONDA RIGHTER. Managing queues with heterogeneous servers
- 453 JI HWAN CHA AND EUI YONG LEE. A stochastic breakdown model for an unreliable Web server system and an optimal admission control policy
- 467 JOSE BLANCHET AND CHENXIN LI. Efficient simulation for the maximum of infinite horizon discrete-time Gaussian processes
- 490 RICARDO VÉLEZ IBARROLA, TOMÁS PRIETO-RUMEAU. Conditionally independent increment point processes
- 514 ADAM JAKUBOWSKI AND JOANNA KARŁOWSKA-PIK. Processes with block-associated increments
- 527 PATRIZIA BERTI, IRENE CRIMALDI, LUCA PRATELLI AND PIETRO RIGO. A central limit theorem and its applications to multicolor randomly reinforced urns
- 547 IOSIF PINELIS. Exact lower bounds on the exponential moments of truncated random variables

Short Communications

- 561 DARIO GASBARRA, TOMMI SOTTINEN AND HARRY VAN ZANTEN. Conditional full support of Gaussian processes with stationary increments
- 569 RAVI KALPATHY, HOSAM M. MAHMOUD AND MARK DANIEL WARD. Asymptotic properties of a leader election algorithm
- 576 JEAN BERTOIN. On the maximal offspring in a critical branching process with infinite variance
- 583 YAMING YU. Concave renewal functions do not imply DFR interrenewal times
- 589 MOSHE POLLAK AND ALEXANDER G. TARTAKOVSKY. On the first exit time of a nonnegative Markov process started at a quasistationary distribution

Research Papers

- 597 JIANPING JIANG, SANGUO ZHANG AND TIANDE GUO. Russo's formula, uniqueness of the infinite cluster, and continuous differentiability of free energy for continuum percolation
- 611 A. TZIOUFAS. On the growth of the one-dimensional reverse immunization contact processes
- 624 VALDIVINO V. JUNIOR, FÁBIO P. MACHADO AND MAURICIO ZULUAGA. Rumor processes on \mathbb{N}
- 637 NING CAI. Pricing and hedging of quantile options in a flexible jump diffusion model
- 657 KARL SIGMAN AND WARD WHITT. Heavy-traffic limits for nearly deterministic queues
- 679 TSUYOSHI KATAYAMA. Some results for vacation systems with sojourn time limits
- 688 KEN R. DUFFY AND GIOVANNI LUCA TORRISI. Sample path large deviations of Poisson shot noise with heavy-tailed semiexponential distributions
- 699 TOMOYUKI ICHIBA AND CONSTANTINOS KARDARAS. Efficient estimation of one-dimensional diffusion first passage time densities via Monte Carlo simulation
- 713 P. ZIPKIN. On Durbin's series for the density of first passage times
- 723 LIJUN BO, YONGJIN WANG AND XUEWEI YANG. First passage times of (reflected) Ornstein–Uhlenbeck processes over random jump boundaries
- 733 JULIA EISENBERG AND HANSPETER SCHMIDL. Optimal control of capital injections by reinsurance with a constant rate of interest
- 749 ANDREI L. BADESCU, ERIC C. K. CHEUNG AND LANDY RABEHASAINA. A two-dimensional risk model with proportional reinsurance
- 766 KOUJI YANO AND KENJI YASUTOMI. Realization of an ergodic Markov chain as a random walk subject to a synchronizing road coloring
- 778 HARRY CRANE. A consistent Markov partition process generated from the paintbox process
- 792 MATTHIEU MAROUBY. Micropulses and different types of Brownian motion
- 811 ALEKSANDAR MIJATOVIĆ AND MIKHAIL URUSOV. A note on a paper by Wong and Heyde
- 820 CHIHOON LEE. A geometric drift inequality for a reflected fractional Brownian motion process on the positive orthant
- 832 NADER EBRAHIMI AND YARONG YANG. An integrated probabilistic model for assessing a nanocomponent's reliability
- 843 ILYA GERTSBAKH, YOSEPH SHPUNGIN AND FABIO SPIZZICHINO. Signatures of coherent systems built with separate modules
- 856 JORGE NAVARRO, FRANCISCO J. SAMANIEGO AND N. BALAKRISHNAN. Signature-based representations for the reliability of systems with heterogeneous components
- 868 JI HWAN CHA AND MAXIM FINKELSTEIN. Stochastic intensity for minimal repairs in heterogeneous populations

Short Communications

- 877 MAOCHAO XU AND N. BALAKRISHNAN. On the convolution of heterogeneous Bernoulli random variables
- 885 TORREY JOHNSON AND EDWARD C. WAYMIRE. Tree polymers in the infinite volume limit at critical strong disorder
- 892 STEFAN GERHOLD. The Hartman–Watson distribution revisited: asymptotics for pricing Asian options

Research Papers

- 901 VLADIMIR EJOV, NELLY LITVAK, GIANG T. NGUYEN AND PETER G. TAYLOR. Proof of the Hamiltonicity-trace conjecture for singularly perturbed Markov chains
- 911 ASGER HOBOLTH AND JENS LEDET JENSEN. Summary statistics for endpoint-conditioned continuous-time Markov chains
- 925 YUANYUAN LIU. Additive functionals for discrete-time Markov chains with applications to birth–death processes
- 938 MICHEL DEKKING AND DERONG KONG. Multimodality of the Markov binomial distribution
- 954 CHIN HON TAN AND JOSEPH C. HARTMAN. Sensitivity analysis in Markov decision processes with uncertain reward parameters
- 968 MATTHIAS DEGEN AND PAUL EMBRECHTS. Scaling of high-quantile estimators
- 984 IRMINA CZARNA AND ZBIGNIEW PALMOWSKI. Ruin probability with Parisian delay for a spectrally negative Lévy risk process
- 1003 JOHANNES MUHLE-KARBE AND MARCEL NUTZ. Small-time asymptotics of option prices and first absolute moments
- 1021 AO CHEN, LIMING FENG AND RENMING SONG. On the monitoring error of the supremum of a normal jump diffusion process
- 1035 YIQING CHEN. The finite-time ruin probability with dependent insurance and financial risks
- 1049 DONALD E. K. MARTIN AND DEIDRA A. COLEMAN. Distribution of clump statistics for a collection of words
- 1060 GÖTZ OLAF MUNSONIUS AND LUDGER RÜSCHENDORF. Limit theorems for depths and distances in weighted random b -ary recursive trees
- 1081 WEIYU XU AND A. KEVIN TANG. A generalized coupon collector problem
- 1095 ESTÁTE V. KHMALADZE. Convergence properties in certain occupancy problems including the Karlin–Rauoult law
- 1114 ALESSANDRO ARLOTTO, ROBERT W. CHEN, LAWRENCE A. SHEPP AND J. MICHAEL STEELE. Online selection of alternating subsequences from a random sample
- 1133 ALEXANDER GNEDIN, ALEXANDER IKSANOV AND ALEXANDER MARYNYCH. On Λ -coalescents with dust component
- 1152 B. N. B. DE LIMA, R. SANCHIS AND R. W. C. SILVA. Percolation of words on \mathbb{Z}^d with long-range connections
- 1163 TOM BRITTON, MATHIAS LINDHOLM AND TATYANA TUROVA. A dynamic network in a dynamic population: asymptotic properties
- 1179 MAOCHAO XU AND TAIZHONG HU. Some inequalities of linear combinations of independent random variables. I.

Short Communications

- 1189 QUNQIANG FENG AND ZHISHUI HU. On the Zagreb index of random recursive trees
- 1197 ALEXANDER GNEDIN AND ALEXANDER IKSANOV. Moments of random sums and Robbins' problem of optimal stopping

Letter to the Editor

- 1200 BERNARD WONG. On Wong and Heyde (2004)

- 1201 Index

Subscription rates

Subscription rates for volume **48** (2011) of *Journal of Applied Probability (JAP)* are as follows (post free and including online access at <http://projecteuclid.org/jap/>): US\$312.00; A\$360.00; £195.00 for libraries and institutions; or US\$104.00; A\$120.00; £65.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **43** (2011) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 272 9782; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Research papers are published in both *Journal of Applied Probability (JAP)* and *Advances in Applied Probability (AAP)*, with longer papers typically appearing in *AAP*. However, assignment of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, *AAP* publishes letters specifically related to papers that have appeared in *AAP* and *JAP* publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in *JAP*. Review papers and papers in *stochastic geometry and statistical applications* are published in *AAP*.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (<http://www.ams.org/msc/>). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the \LaTeX class file `aptpub.cls`, available from <http://www.appliedprobability.org/>. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files (with hard copy back-up). All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is japaap@sheffield.ac.uk. Authors should also submit one hard copy to the Executive Editor, as above.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see <http://www.copyright.com>) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/11
