Editor-in-chief

P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

Editor-in-Chief

Agneta Yngve, Karolinska Institutet, Sweden

Public Health Nutrition provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

Bulk Article Reprints

Reprints of articles published in this journal can be purchased for use by your company or organisation. These reprints can be produced as straight article reprints or with custom designed covers and, if required, the sponsor's name printed on or inside the cover. Reprints represent a versatile sales tool for the distribution of up-to-date information on your particular areas – via your sales force, direct mail campaigns and as handouts at major conferences and commercial exhibitions. Reprints can usually be delivered to clients 2-4 weeks after the receipt of the order.

Proceedings of the Nutrition Society

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutrition-society.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or pns@nutsoc.org.uk (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235×177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures, starting with the objective followed by the key findings and ending in clear conclusion. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing

their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

University College Cork, Republic of Ireland, 15–17 June 2011

70th Anniversary Conference on 'Vitamins in early development and healthy aging: impact on infectious and chronic disease'

Symposium 3: Vitamin D and immune function: from pregnancy to adolescence

Chairs: M. Kiely, University College Cork, Republic of Ireland; G. Goldberg, MRC Human Nutrition Research, Cambridge, UK

Vitamin D and adverse pregnancy outcomes: beyond bone health and growth
P. M. Brannon 205

Symposium 4: Vitamins, infectious and chronic disease during adulthood and aging

Chairs: R. Wood, University of Massachusetts, USA; J. Wallace, University of Ulster, UK

C₁ metabolism and CVD outcomes in older adults
H. McNulty, J. J. Strain, K. Pentieva & M. Ward 213

University of Reading, 4–6 July 2011
70th Anniversary Conference on 'From plough through practice to policy'

Symposium 1: Food chain and health

Chair: C. Wagstaff, University of Reading, UK

Linking agriculture and health in low- and middle-income countries: an interdisciplinary research agenda
A. D. Dangour, R. Green, B. Häslar, J. Rushton, B. Shankar & J. Waage 222

Symposium 2: Nutrition and health claims: help or hindrance

Chair: C. Williams, University of Reading, UK

European consumers and health claims: attitudes, understanding and purchasing behaviour
J. M. Wills, S. Storcksdieck genannt Bonsmann, M. Kolka & K. G. Grunert 229

Postgraduate Symposium

Chairs: A. Gallagher, University of Ulster, UK; S. Lockyer, University of Reading, UK

Epigenetic and antioxidant effects of dietary isothiocyanates and selenium: potential implications for cancer chemoprevention
L. N. Barrera, A. Cassidy, I. T. Johnson, Y. Bao & N. J. Belshaw 237

Flavonoids as modulators of memory and learning: molecular interactions resulting in behavioural effects
C. Rendeiro, J. D. T. Guerreiro, C. M. Williams & J. P. E. Spencer 246

Symposium 3: Obesity-related cancers

Chair: P. Calder, University of Southampton, UK

Energy restriction and the prevention of breast cancer
M. Harvie & A. Howell 263

Puerto Vallarta, Mexico, 6–8 April 2011
5th International Immunonutrition Workshop

Opening Lecture

Chair: R. Valdés-Ramos, Universidad Autónoma del Estado de México, Mexico

Interplay of early-life nutritional programming on obesity, inflammation and epigenetic outcomes
J. A. Martínez, P. Cordero, J. Campión & F. I. Milagro 276

Fatty acids

Chairs: L. Harbige, University of Greenwich, UK; A. Puente, Universidad Autónoma del Estado de México, Mexico

Long-chain fatty acids and inflammation
P. C. Calder 284

Micronutrients, immunology and inflammation

Chairs: M. Dardenne, Université Paris Descartes, France; B. Martínez Carrillo, Universidad Autónoma del Estado de México, Mexico

Effect of vitamin A deficiency on the immune response in obesity
O. P. García 290

The impact of obesity on the immune response to infection
J. J. Milner & M. A. Beck 298

Alcohol

Chairs: S. Gómez, ICTAN-CSIC, Spain; R. Virgen Pardo-Morales, Universidad Autónoma del Estado de México, Mexico

Potential health benefits of moderate alcohol consumption: current perspectives in research
E. Nova, G. C. Baccan, A. Vese, B. Zapatera & A. Marcos 307

Influence of polyphenols on allergic immune reactions: mechanisms of action
T. Magrone & E. Jirillo 316

Chronic and degenerative diseases

Chairs: R. Valdés-Ramos, Universidad Autónoma del Estado de México, Mexico; N. Ramírez-Durán, Universidad Autónoma del Estado de México, Mexico

Similarities and differences between the effects of EPA and DHA on markers of atherosclerosis in human subjects
D. S. Kelley & Y. Adkins 322

Obesity, inflammation and the immune system
F. Pérez de Heredia, S. Gómez-Martínez & A. Marcos 332

University of Reading, 4–6 July 2011
Satellite Symposium: Industry and academic partnerships for developing health-improving products

Safety and efficacy of high-protein diets for weight loss
A. M. Johnstone 339

Satiety-enhancing products for appetite control: science and regulation of functional foods for weight management
J. C. G. Halford & J. A. Harrold 350
